

# Works Completed

Cathedral of the Immaculate Conception.  
Kansas City, MO

**A Summary of Church &  
Religious School Projects  
Now in Progress or Recently Completed**

## WORKS IN PROGRESS

Church and Christian School Projects in Progress or Recently Completed

---

### TRINITY CHURCH, WALL STREET

New York, NY

This historic church in the heart of lower Manhattan was consecrated in 1846. It is also the home of St. Paul's Chapel, the "little chapel that stood" after September 11, which now serves as a congregation for peace and reconciliation. The present day Trinity Church, designed by architect Richard Upjohn, is considered a classic example of Gothic Revival architecture and is designated a National Historic Landmark for its architectural significance and place within the history of New York City. As with many historic church buildings, Trinity has glorious acoustics for music but has had problems with speech intelligibility for many years.

Acoustical Services: Full analysis and diagnosis of acoustics and sound reinforcement in preparation for a new sound system.  
Date Begun: May 2007                      Date Completed: January 2008

---

### ST. JOHN'S CHURCH, LAFAYETTE SQUARE (THE PRESIDENT'S CHURCH)

Washington, DC

Renovation and refurbishment of "The Church of the Presidents," including acoustical improvements for a new pipe organ. St. John's is a registered as a national historic landmark building designed by Benjamin Henry Latrobe. James Madison, and several early presidents after him, were communicants, as were some more recent chief executives. St. John's first service was held in October 1816. From that time to the present, every person who has held the office of President of the United States has attended a regular or occasional service at St. John's. Pew 54 is the President's Pew, and is reserved for the chief executive's use when in attendance.

Acoustical Services: Full acoustic design, preparation for a fine new pipe organ, audio system design  
Architect: Bowie Gridley Architects. Washington, DC  
Organ Builder: Lively-Fulcher Organbuilders  
Date Begun: November 2006                      Date Completed: January 2009

---

### SACRED HEART CATHEDRAL

Rochester, NY

Full acoustical design services for a major renovation including relocation of the music ministry from the balcony to apse and preparations for a new Paul Fritts pipe organ to be installed in the future. The renovation also included the installation of air-conditioning. The new sound system will utilize line-array loudspeakers to provide highly intelligible speech with minimal visual impact, while preserving the glorious reverberation of 4.6 seconds.

Acoustical Services: Complete Acoustical Design Including Room Acoustics, Mechanical Noise & Sound Reinforcement  
Architect: Williamson Pounders Architects, PC. Memphis, TN  
Liturgical Design Consultant: Fr. Richard Vosko  
Organ Builder: Paul Fritts & Company Organ Builders. Tacoma, WA  
Date Begun: August 1999                      Date Completed: January 2005

---

**MORE WORKS IN PROGRESS OR RECENTLY COMPLETED**

---

---

**CATHEDRAL OF THE MOST BLESSED SACRAMENT**

Detroit, MI

Full acoustical design services for a major renovation. A new Austin pipe organ was installed in the apse and the existing Casavant organ in the loft was renovated. The renovation will also include the installation of air-conditioning. The new sound system will utilize line-array loudspeakers to provide highly intelligible speech with minimal visual impact, while preserving the glorious reverberation of 5.3 seconds.

Acoustical Services: Complete Acoustical Design Including Room Acoustics, Mechanical Noise & Sound Reinforcement

Architect: Gunnar Birkerts, FAIA; Detroit, MI

Architect/Engineering: DiClemente Siegel Design, Inc.; Southfield, MI

Organ Builder: Austin Organs, Inc., Hartford, CT

Liturgical Design Consultant: Robert Rambusch

Date Begun: August 1998

Date Completed: March 2003

---

**CATHEDRAL OF OUR LADY OF GUADALUPE**

Dodge City, KS

The first new Cathedral of the Millennium. Full acoustical design services for a new cathedral, which is being formed by the combination of two parishes. Among the special challenges for this new 1000-seat cathedral will be the provision of accommodations for diverse, multi-cultural music ministries including Hispanic and Vietnamese music traditions.

Acoustical Services: Complete Acoustical Design Including Room Acoustics, Mechanical Noise & Sound Reinforcement

Architect and Liturgical Design Consultant: RD Habiger & Associates, Inc.; Albuquerque, NM.

Date Begun: April 1998

Date Completed: December 2001

---

**SAINT MICHAEL CATHOLIC CHURCH**

Wheaton, IL

Full acoustics consulting and design services for a new 1,000-seat Catholic Church. Provision for a new Rodgers hybrid (combination pipe/electronic) organ.

Acoustical Services: Room Acoustics, Mechanical System Noise & Vibration Control, and Sound System Design

Architect: Ruck/Pate Architecture. Barrington, IL

Date Begun: November 2003

Date Completed: April 2006

---

**THE CATHEDRAL BASILICA OF THE ASSUMPTION**

Covington, KY

Full acoustical design services for a renovation. This Gothic Cathedral is modeled on the 13<sup>th</sup>-Century French style, and it includes three pipe organs (loft, transept and sanctuary). The work is to be primarily preservation and restoration, but there are also plans to install a new air-conditioning system.

Acoustical Services: Complete Acoustical Design Including Room Acoustics, Mechanical Noise & Sound Reinforcement

Liturgical Design Consultant: Bill Brown, AIA, PC; Colorado Springs, CO

Design Architect: Bill Brown, AIA, PC; Colorado Springs, CO

Production Architect: KZF Incorporated; Cincinnati, OH

Organ Builder: Miller Pipe Organ Company. Louisville, KY

Date Begun: March 1999

Date Completed: December 2001

---

**MORE WORKS IN PROGRESS OR RECENTLY COMPLETED**

---

---

**CONCORDIA SEMINARY CHAPEL**

St. Louis, MO

The Chapel of Saint Timothy and Saint Titus opened in 1992 but, according to faculty and staff members, the sound reinforcement system has never provided satisfactory speech intelligibility. Sound contractors have recommended installing carpet and acoustical panels. But, with a fine Casavant pipe organ and rich singing tradition, the idea of reducing reverberation was not an acceptable option. A new sound system will be designed to provide excellent speech intelligibility with absolutely no reduction in reverberation.

Acoustical Services: Complete Design and Specification of a New Sound Reinforcement System

Date Begun: March 2005

Date Completed: In Progress

---

**CATHEDRAL OF THE IMMACULATE CONCEPTION**

Kansas City, MO

Full acoustical design services for a major renovation including architectural acoustics for a Cathedral known for its fine acoustics and diverse music series. Acoustical challenges included the removal of an spray-on asbestos material covering the entire barrel-vault ceiling, expansion and lowering of the choir loft, and the installation of a Fratelli Ruffatti Pipe Organ.

Liturgical Design Consultant and Design Architect: Carol Frenning. Minneapolis, MN

Architect : Shaughnessy Fickel & Scott Architects Inc.

Organ Builder: Fratelli Ruffatti Pipe Organ Builders. Padua, Italy

Date Begun: August 2000    Completion Date: February 2003

---

**SAINT MARY'S CATHEDRAL**

Colorado Springs, CO

Full acoustical design services for a renovation. The work includes the enlargement of seating, expansion of an existing pipe organ, and the development of post-Vatican II elements for the worship environment.

Acoustical Services: Complete Acoustical Design Including Room Acoustics, Mechanical Noise & Sound Reinforcement

Architect : RD Habiger & Associates, Inc.; Albuquerque, NM.

Associate Architect: Design Resource; Colorado Springs, CO. Project Mgr: Bill Beard

Liturgical Design Consultant: Father Richard Vosko

Date Begun: June 1998

Date Completed: In Progress. Opening in May 2003

---

**FIRST CONGREGATIONAL CHURCH**

Akron, OH

Complete restoration and historic preservation of a landmark 1910 building, Akron's oldest church, founded in 1833. The existing 1951 Casavant pipe organ is being restored and expanded as a major part of this project. Glued-on acoustical ceiling tiles had been installed in the mid Twentieth Century and will be removed to restore the original acoustical qualities.

Acoustical Services: Room Acoustics, Mechanical System Noise & Vibration Control, and Sound System Design

Architect: Chambers, Murphy & Burge Restoration Architects, Ltd.

Organ Builder: Casavant Frères. Saint-Hyacinthe, Québec

Date Begun: October 2004

Date Completed: January 2007

---

**MORE WORKS IN PROGRESS OR RECENTLY COMPLETED**

---

---

**HOLY ROSARY CHAPEL, ADRIAN DOMINICAN SISTERS**

Adrian, MI

Complete renovation of the Motherhouse Chapel including historical restoration, renovation, liturgical renewal, complete HVAC systems, relocation and reconfiguration of music ministry and installation of a fine new pipe organ.

Acoustical Services: Room Acoustics, Music Ministry Design, Acoustical Preparations for Pipe Organ & Sound System Design

Architect: DiClemente Siegel Design, Inc. Southfield, MI

Liturgical Design Consultant: Robert E. Rambusch Associates. New York, NY

Organ Builder: Holtkamp Organ Company. Cleveland, OH

Date Begun: January 2001

Date Completed: December 2003

---

**MISSION BASILICA**

San Juan Capistrano, CA

The Mission Basilica is an extraordinary acoustical environment highly regarded for its music. But with a reverberation period of 5.5 seconds, speech intelligibility is a substantial challenge and has been for many years. With the prospect of installing a fine new pipe organ the people of the Mission Basilica sought to improve speech intelligibility while preserve the glorious acoustical character.

Acoustical Services: Full design and specification of a new sound reinforcement system using active line-array technology

Organ Builder: Pending

Date Begun: April 2006

Date Completed: In Progress

---

**ST. PHILIP PRESBYTERIAN CHURCH**

Houston, TX

Summary description of acoustics scope of work along with any special considerations

Acoustical Services: Room Acoustics, Acoustical Preparations for Pipe Organ & Sound System Design

Architect: Jackson & Ryan Architects. Houston, TX

Liturgical Design Consultant: Terry Byrd Eason Design. Chapel Hill, NC

Organ Builder: Paul Fritts & Company Organ Builders. Tacoma, WA

Date Begun: October 2004

Date Completed: January 2007

---

**CATHEDRAL OF THE IMMACULATE CONCEPTION**

Fort Wayne, IN

Full acoustical design services for a renovation. The renovation includes much needed repair and maintenance items and many elements of post-Vatican II environment and art for worship. The music ministry (once in the loft but now in a low, hidden recess on the main level) will be moved to a new location where it can effectively serve liturgy while allowing the music ministers to be a part of the faith gathering.

Liturgical Design Consultant and Design Architect: Bill Brown, AIA, PC; Colorado Springs, CO

Production Architect: The Troyer Group; Mishawaka, IN.

Organ Builder: Wicks Organ Company, Highland, IL (S. C. Hedstrom Pipe Organs. Indianapolis, IN)

Date Begun: September 1997

Completion Date: December 1998

**MORE WORKS IN PROGRESS OR RECENTLY COMPLETED**

**SAINT MARY CATHEDRAL OF THE IMMACULATE CONCEPTION**

Lafayette, IN

Full acoustical design services for a renovation. The renovation work is primarily aimed at restoration and preservation with the introduction of liturgical elements and installation of a new air-conditioning system. Since this church serves both Diocesan and Parish liturgies, the existing choir loft and Wicks pipe organ will be preserved and developed while a sanctuary music area will be improved for more contemporary music.

Acoustical Services: Complete Acoustical Design Including Room Acoustics, Mechanical Noise & Sound Reinforcement

Architect: The Scholer Corporation Architects and Engineers; Lafayette, IN

Organ Builder: Wicks Organ Company, Highland, IL (S. C. Hedstrom Pipe Organs. Indianapolis, IN)

Date Begun: May 1998

Date Completed: December 2000

**SAINT THOMAS AQUINAS CATHOLIC CHURCH**

Avondale, AZ

The new St. Thomas Aquinas Catholic church is now under construction. Phase one includes a new church with seating for over 1,600, a K-8 parochial school and offices. The master plan of the 34-acre property includes a Catholic high school, chapel, life teen center, seniors center and an expansion of the K-8 school. Modeled after the California missions, the large scale of the campus is linked by a series of intimate courtyards landscaped with lush shade trees and connected by protective arcades.

Architect: CCBG Architects, Inc.; Phoenix, AZ. Project Mgr: Paul Ladensack

Restoration Artists: Conrad Schmitt Studios; New Berlin, WI

Date Begun: February 2001

Expected Completion Date: November 2003

**SANTA MARIA DE LA VID**

Albuquerque, NM

Full acoustical design and specification for a Norbertine monastery chapel. This project received the *1999 Visual Arts Award* by Ministry and Liturgy.

Architect and Liturgical Design Consultant: RD Habiger & Associates, Inc.; Albuquerque, NM.

**SAINT JOSEPH ON THE RIO GRANDE CATHOLIC CHURCH**

Albuquerque, NM

Full acoustical design services including room acoustics, mechanical noise control, and sound system specification for a new 1200-seat Catholic Church with an extensive music ministry.

Architect: RD Habiger & Associates, Inc.; Albuquerque, NM. Project Mgr: Ken Griesemer

**PAX CHRISTI CATHOLIC CHURCH**

Littleton, CO

Full acoustical design services for a new Catholic Church, the first building for this new parish.

Architect: Design Resources; Colorado Springs, CO. Liturgical Design Consultant and Architect: Bill Beard

---

**MORE WORKS IN PROGRESS OR RECENTLY COMPLETED**

---

---

**HOUGHTON COLLEGE MUSIC BUILDING & RECITAL HALL**

Houghton, NY

Houghton College is a Christian college of liberal arts with a strong and highly respected music department. The music department is now housed in one of the oldest buildings on campus: a building that is not equal to the caliber and stature of the faculty and students. The new music building will include classrooms, practice rooms, music teaching studios, choral and instrumental rehearsal rooms, organ practice rooms, an art gallery, and a 250-seat performance/recital hall. The new building will be linked to the College Chapel, the home of a large Holtkamp pipe organ.

Acoustical Services: Complete Acoustical Design Including Room Acoustics, Mechanical Noise & Sound Reinforcement  
Architect: RSA Architects, Inc.; Syracuse, NY. Project Mgr: Larry Apgar  
Date Begun: June 1995 Date Completed: August 1999

---

**SAINT JUDE CATHOLIC CHURCH**

Fort Wayne, IN

The second project MuSonics has ever undertaken devoted entirely to a Music Master Planning investigation in the context of guidelines and instructions in liturgical documents. For more details, see the description above for St. Elizabeth Ann Seton Church in Troy, MI.

Acoustical Services: Music Master Planning and Space Planning for Post-VC-II Liturgical Reforms  
Architect: Bill Brown, AIA, PC; Colorado Springs, CO.  
Date Begun: October 1996 Date Completed: September 1998

---

**HOLY CHILDHOOD OF JESUS CATHOLIC CHURCH**

Harbor Springs, MI

Renovation/restoration and expansion of an historic landmark church.

Acoustical Services: Room Acoustics, Mechanical System Noise & Vibration Control, and Sound System Design  
Architect: Swanson Design Studios; Lansing, MI  
Liturgical Design Consultant: Christine Reinhard; Harbor Springs, MI  
Date Begun: September 1996 Date Completed: August 1998

---

**SAINT ANDREW CATHOLIC CHURCH**

Columbus, OH

St. Andrew's parish is active and growing, so active that seven services are needed each weekend to accommodate its parishioners. The new church will seat an assembly of 1,000 worshipers. With a strong music ministry and a projected budget of \$500,000 for a new pipe organ, the new building is to be modeled on European concepts to provide the acoustical qualities necessary to support the new instrument and to provide an uplifting and compelling environment for worship.

Acoustical Services: Complete Acoustical Design Including Room Acoustics, Sound Reinforcement and Mechanical Noise  
Audio Design: Functional/Performance Specification by MuSonics; System Design by: TBD  
Architect: Feinknopf Macioce Schappa, Architects, Inc.; Columbus, OH. Project Mgr: Peter Krajnak  
Organ Builder: Austin Organs, Inc., Hartford, CT  
Date Begun: February 1995 Date Completed: June 1998

**MORE WORKS IN PROGRESS OR RECENTLY COMPLETED**

---

**OUR LADY QUEEN OF THE MOST HOLY ROSARY CATHEDRAL**

Toledo, OH

A renovation completed in the early 1980s did not include the sound reinforcement system. With a ceiling height of 96 feet, a length of 285 feet, and a reverberation time to accommodate a large Aeolian Skinner pipe organ, this is among the most challenging environments for sound reinforcement and speech intelligibility. The highest priorities are to provide excellent speech intelligibility with a minimum of visual intrusion by audio system component, while maintaining the existing reverberation.

Date Begun: April 1997

Date Completed: April 1998

---

**SAINT MARY MAGDALEN CATHOLIC CHURCH**

Brighton, MI

Full acoustical design services for a new Catholic Church, the first building for this new parish.

Co-Architects: Mamola Associates Architects; Novi, MI and Neumann Smith Architects; Southfield, MI

Liturgical Design Consultant: Christine Reinhard; Flushing, MI

---

**SAINT MARY CATHOLIC COMMUNITY**

Helena, MT

Full acoustical design for the renovation of a 500-seat church. Renovation issues will include sound systems, music ministry, and acoustical difficulties caused by an octagonal floor plan.

Liturgical Design Consultant and Design Architect: Bill Brown, AIA, PC; Colorado Springs, CO.

Production Architect: Bjerke Architects.; Helena, MT. Project Mgr: Susan Bjerke

Pipe Organ Builder: The Rutz Organ Company; Morristown, MN

Date Begun: June 1995

Date Completed: August 1998

---

**CATHEDRAL OF SAINT FRANCIS OF ASSISI**

Santa Fe, NM

Acoustics and audio system evaluation to develop recommendations and corrective measures for a glorious and historic cathedral that has speech intelligibility problems.

Date Begun: November 1995 Date Completed: November 1996

---

**THE CHURCH OF SAINT JOHN THE DIVINE**

Houston, TX

A new 145-rank Letourneau pipe organ was installed in this relatively small and unreverberant church designed by Frank Lloyd Wright. All reasonable and affordable measures will be taken to increase reverberation. Completely new audio and video systems were installed as well as new air conditioning.

Acoustical Services: Room Acoustics, Mechanical System Noise & Vibration Control, and Audio and Video Systems Design

Architect: Jackson & Ryan Architects. Houston, TX

Liturgical Design Consultant: Terry Byrd Eason Design. Chapel Hill, NC

Organ Builder: Orgues Letourneau Limitée. Saint-Hyacinthe, Québec

Date Begun: August 2003

Date Completed: In Progress. Expected completion in 2006

**MORE WORKS IN PROGRESS OR RECENTLY COMPLETED**

---

**SAINT JOHN THE EVANGELIST CATHOLIC CHURCH**

Delphos, OH

Beautification and preservation of a 150-year old, 1200-seat Gothic cathedral with a Möller pipe organ.

Architect: Feinknopf Macioce Schappa, Architects, Inc.; Columbus, OH. Project Mgr: Peter Krajnak

Restoration Artists: Conrad Schmitt Studios; New Berlin, WI

Date Begun: June 1996

Expected Completion Date: November 1998

---

**ASSUMPTION GREEK ORTHODOX CATHEDRAL**

Denver, CO

Acoustical recommendations and sound system design for the renovation of a church with a unique and extraordinarily difficult acoustical environment caused by its 60-foot high hemispherical shape.

Architect: Ekona Architects; San Francisco, CA.

Date Begun: July 1997

Date Completed: August 1998

---

**SAINT PETER THE FISHERMAN CATHOLIC CHURCH**

Two Rivers, WI

Full acoustics consulting and design services for a new 1,000-seat Catholic Church. Provision for a new pipe organ to be installed in 2006.

Acoustical Services: Room Acoustics, Mechanical System Noise & Vibration Control, Sound System Design

Architect: Birschbach & Associates, LTD. Appleton, WI

Liturgical Design Consultant: Fr. Mark Joseph Costello, Capuchin

Date Begun: June 2003

Date Completed: April 2005

---

**WESTMINSTER PRESBYTERIAN CHURCH**

Waterloo, IA

Complete renovation undertaken to improve acoustics for a new Casavant pipe organ and congregational singing. The acoustical effort resulted in an increase in reverberation time of nearly 1 second: from 1.4 seconds before the renovation to 2.3 seconds. A new sound reinforcement system provides improved speech intelligibility even with the new and more reverberant acoustics.

Acoustical Services: Room Acoustics and Sound System Design

Architect: Struxture Architects. Waterloo, IA

Organ Builder: Casavant Frères. Saint-Hyacinthe, Québec

Date Begun: January 2001

Date Completed: November 2004
